- Receive Notifications when material reaches a threshold level
- Track all your orders – Inwards, Requests, Issues, Returns
- Cassini Collaboration tools helps to be in constant touch with the team.
- Dashboards and Reports – Give a quick view to make faster & accurate decisions
- Better reporting and analytics

Cassini.IM Features

Warehouse

Cassini.IM helps to create a Digital Twin of your warehouses. This is exact replica of your warehouses with all the necessary details covering from Departments to warehouses to racks, shelves and bins. And all these are marked with barcode for easy identification using Cassini.IM Mobile app.

BOM: Bill-of-Materials

Cassini.IM BOM Management capabilities helps you to create, import and manage the BOM / Parts information. This can be single source of approved materials and parts list to manage inventory. This BOM data is the source for all the inventory management transactions like Inwards, Requests, Issues, Returns, and Reports.

Workflow

Cassini.IM facilitates to create multiple workflows for all your inventory processes like Requests, Issues and Returns. Workflows helps to standardize & automate your business processes. Workflows also helps in speeding up and tracking operations thus improving productivity.

Requisition Process

Cassini.IM offers automated workflow process for material requisition. Once a request is raised, automatically necessary notifications are sent to approving authority. As soon as the request is approved, Store manager is notified to issues the material requested.

Stock Movement

Stock Movement shows the in & out movement of the stocks due to sale, transfer, sales return or stocking in inventories. Stock movement provides a clear picture on which batch number material is moved to which locations.

Lot Management

Lots are stored in a queue in stock rooms by date of expiration, lots have been issued first in first out (FIFO) basis. Cassini.IM provide alerts when material reaches expiration status. And automatically disable to issue any expired materials.

Dashboard - Reports

Cassini.IM displays right information with right access privileges as Dashboards. These dashboards will give a quick access to complete inventory status thus helping to make faster and better informed decisions. In addition, can generate reports to provide better insights into Inventory information.
