

“Recognized as one of India’s most promising SaaS/Cloud companies” - *CIOReview Magazine*

# Cassini.IS

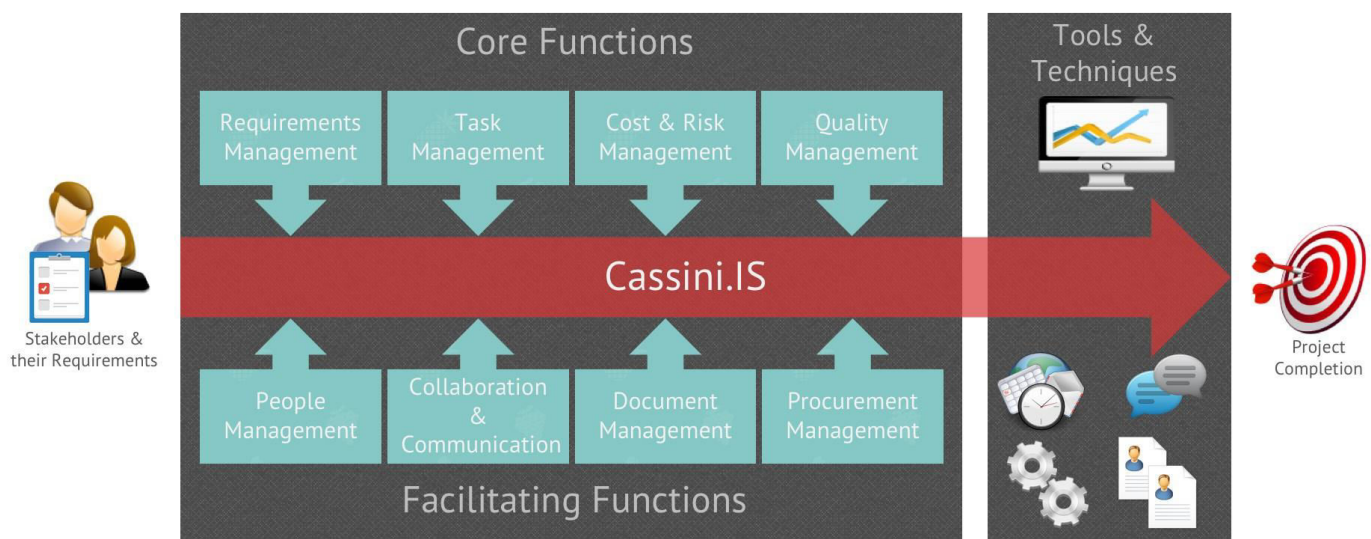

End to end infrastructure solution

(An ISO 9001 : 2008 Company)

# Introduction

Cassini.IS is an end-to-end infrastructure project management solution that helps organisations manage and track project costs, schedules, resource and quality. Cassini.IS has a number of modules to various aspects of your infrastructure projects, from requirements, resource planning, document management, task management and scheduling, inventory management to track material flow, risk assessment and contingency plans and project quality.

Cassini.IS allows you to complete your project on time and within planned costs. It allows you to monitor scope, time and cost to maintain desired project quality. It provides traceability and accountability across the project lifecycle. It enables better collaboration and communication among your project teams.

## Benefits of Cassini.IS

- Centralize all your project related information
- Effectively plan and manage all project activities
- Eliminate project delays and cost overruns
- Enable traceability and accountability
- Encourage consistent communication among project teams
- Manage all project related documents and their revisions in one place
- Track resource utilization with a robust task manager
- Gain deep insights into your project activities with analytics and reports
- Track project issues and other quality metrics
- Enable and enforce best practices through standardized workflows
- Regularly audit your projects with built-in audit tools
- Customizable dashboards for your project managers, engineers and directors
- Streamline the material procurement process and track inventory
- Enable knowledge share through documented lessons learnt
- Enable data access from anywhere with our mobile solution

# Cassini.IS Modules

## Project Management

Provides a number of tools for day-to-day execution of project activities. This module has a number of tools for planning, estimating and scheduling of resource from project inception to project closure. You can organize your projects into portfolios and programs.

## Requirements Management

Manage stakeholder needs and requirements to meet project objectives, manage the scope of the project. Project plan, requirements documentation, requirement traceability matrix and list of other deliverables can be managed.

## Document Management

Cassini.IS's document management offers a number of features like version management, change notification, role based access control, and comments/messages to communicate with team members. You can also create workspaces and folders to organize your documents & drawings.

## Task Management

Assign tasks to individuals upon their ability and skill to complete the given task and track the work status to whom you assigned and how effectively it was done. High level tasks are broken down into activities and assign those activities to individuals and track the status in realtime.

## Quality Management

Define various quality grades for different entities like requirements, activities, resource assignment, etc. You can define expected and achieved grades for these entities. You can measure the quality of the project as it progresses and take any corrective measures.

## Procurement Management

Cassini.IS offers a number of features to define approved vendor list, products they supply, cost of each product and lead times for them. This helps project manager plan accordingly. Cassini.IS also allows you to create RFQs and RFIs and involve vendors directly in the project.

## Collaboration & Communication

A number of communication tools that your project teams can use to inform and be informed about all aspects of the project. You can use tools like comments, in-context messages across different entities like projects, tasks, documents, estimates and procurement.

## Analytics & Reporting

Our analytics & reporting tools help you gain deep insights into your business from the lowest level of operation to the highest level of monthly, quarterly and yearly financial reports. Each module comes with a set of reports, which you can customize according to your needs.
