

Cassini Systems

Where people and processes meet technology

Your operational  
excellence is our goal

# Our Solutions

## Infrastructure

A comprehensive project management solution to streamline all aspects of your infrastructure projects like railways, highways and irrigation. Improve visibility & traceability, enhance collaboration, minimize risks and eliminate costly delays.

## Manufacturing

A complete manufacturing solution to streamline your product development process. Cut down your time to market, improve your product operations, produce quality products and make sure everything you manufacture conforms to standards.

## Logistics & Transportation

An end-to-end logistics and transportation solution for both shippers and carriers. Improve capacity utilization of your fleet, efficient routing, realtime monitoring of your fleet and streamline your warehouse and inventory management.

## Healthcare

A complete solution to efficiently manage your hospital operations and improve your patient care. Improve your hospital administration, enhance your physician collaboration and integrate your labs, diagnostic centers and pharmacies.

## Pharma & Biotech

A comprehensive solution for managing the R&D, product development, clinical trials, manufacturing, and quality operations and compliance requirement of the pharma and biotech industry. Bring your products to the market faster and cut down your costs.

## Government

A suite of applications for the government organizations to manage and administer their services. Improve collaboration between different government departments and enhance visibility, traceability and governance.

Workflow management solution to automate your business processes. Features include tasks scheduling, with support for both sequential and parallel tasks, user interaction and automatic progression of tasks, file attachments and sign offs, and a workflow modeler.

# Our Services

## Process Assessment

We offer detailed assessment of your business processes and operations and make recommendations on industry best practices and relevant products and technologies and solve critical business problems. We bring in domain specific subject matter experts from various industries to give you the best analysis and suggestions for improvement.

## Digital Conversion

Our in-house experts provide a number of digital conversion services like document imaging, paper to CAD (2D and 3D), X-Ray scanning, OCR document conversion and tape to digital media conversions. We use the latest software and scanning technologies to produce very high quality documents. We offer both onsite and offsite services.

## System Integration

We understand that our solutions are part of an ecosystem of your different IT solutions. To maximize your investment in our solutions, we offer comprehensive integration services so that our solution can seamlessly work with your other systems. We offer data, application and process level integration so that you get the most out of all your solutions.

## Data Migration

We provide a number of migration services like system to system data migration, data mapping, extraction and cleansing, data verification and also deploy ETL solutions. We have expertise in various applications like ERP, MRP, PLM, PDM, HRMS, CRM, MDM, BPM, Big Data, Analytics, Reporting and vast experience in most databases, both RDBMS and NoSQL.

## Application Customization

We understand that not all customer needs are the same. For this reason we offer a number of configuration and customization services to meet your exact needs. We also offer deployment services to get you up and running quickly. Whether it is custom workflows, or UI customizations, or custom report templates, we can do it.

## Training & Certification

We offer onsite and offsite training on our solutions as well as industry best practices from subject matter experts. This is of great value due to the immense knowledge transfer to your teams so that they can put our solutions to the best use and solve critical business problems. We also offer different levels of certification so that your teams can master our solutions.
